PROJECTS

Small Wins — *Built with Express.js, MongoDB, Svelte.js, and Twilio APIs*

https://nikema.dev/projects/small-wins/

- This app accepts a "small win" via text message (sms or whatsapp), replies with a congratulatory image and restatement of the message, and displays the wins in a grid on a webpage. https://small-wins.nikema.now.sh/
- I learned how to access MongoDB and how to create a RESTful API with Express.js specifically for the purpose of building this app.
- A challenge I faced was that I needed to learn the skills and build the app within a few days because I needed an MVP for a deadline.

A-Z Experiences — *Built with React.js*

https://nikema.dev/projects/a-z-experiences/

- This app was a team effort between myself and another React developer.
- We split up the components and pages, I was responsible for the All Experiences page and the Host an Experience page.
  https://a-z-exp.netlify.com/experiences/all
  https://a-z-exp.netlify.com/experiences/add
- Challenges in this project included improvising an API with sheety.co and learning how to work with another developer on a GitHub repository.

Empowered Conversations: Landing Page — *Built with HTML, CSS/Less, JavaScript*

https://nikema.dev/projects/empowered-conversation/

- My role on the team was to create a marketing page and an About Us page for the Empowered Conversation app. I designed and coded it all from scratch.
  https://empowered-conversation-np.netlify.com/np/index.html
- I learned how to work within a GitHub organization and how to deploy a static site to Netlify.
- A challenge I faced was getting all of the different GitHub accounts to work nicely with Netlify. There was a permissions issue that slowed us down at the beginning of the project.

SKILLS

HTML
CSS
JavaScript (es6)
React.js
Node.js
Express.js

AWARDS & FELLOWSHIPS

Founder Institute Female Founders Fellowship (https://fi.co)— Fall 2017
I earned a fellowship to participate in the Fall 2017 semester of Founder Institute in Sacramento, CA. Founder Institute is an idea-stage accelerator and startup launch program.

4.0 Schools Essentials Fellowship (https://4pt0.org) — Fall 2017
As an Essentials fellow, I received funding and coaching to test my educational venture at the idea stage.

EXPERIENCE

PopSchools, Inc., Sacramento, CA — *Founder/CEO*

OCTOBER 2017 - PRESENT

PopSchools provides a suite of products and services to allow for flexible work & living for tech-enabled families.

Code for Hood, Sacramento, CA — *Instructor*

APRIL 2019 - MAY 2019

I taught teens in a summer session about personal branding, content creation, and entrepreneurship.

Code for Hood, Sacramento, CA — *Instructor*

FALL 2017

I created and facilitated an 8-week course on entrepreneurship. I was responsible for twice weekly classes, creating and submitting lesson plans, and attending team meetings.

EDUCATION

Sacramento City College, Sacramento, CA — *Web Developer Certificate*

2007 - 2012
